Project experience

The attendance management project

Platform: CentOS6.5

DataBase: MySQL

Develop IDE: PyCharm 5.0

Framework: Django

Description: This project is designed for all staff to apply and manage attendance in their mobile phone. Besides, The HR dept can use it to count the attendance rate by download the excel table which is generated automatically. This project help HR dept save a lot of work because they used to count the rate manually, so they are really like it. By the way, this project is totally created and updated by myself alone.

Screenshot:

This screenshot shows the main form of the attendance management app. At the top, there's a status bar with '中国联通 4G', '16:52', and '84%' battery. Below it is a navigation bar with a back arrow and '返回'. The form contains several input fields: '请假类型' (Leave Type) with a dropdown arrow, '开始日期' (Start Date) with a calendar icon, '开始时间' (Start Time) with radio buttons for '08:30' and '11:00', '结束日期' (End Date) with a calendar icon, '结束时间' (End Time) with radio buttons for '13:30' and '17:00', '请假天数' (Leave Days) with a red '0' and '天' (days), and '事由/备注' (Reason/Remarks) with a text area. At the bottom, there is a green button labeled '提交' (Submit).

This screenshot shows the date selection calendar. It has the same status bar and navigation bar as the first screenshot. The calendar is for July 2016, with the date '27' highlighted in red. Below the calendar, there are three buttons: '今日' (Today), '清除' (Clear), and '确定' (Confirm).
